

Kiber 3: the third generation of all-in-one AR solutions at ADIPEC, 15-18 November 2021 in Abu Dhabi.

A special showcase on Kiber's latest flexible AR technology solution for workforce empowerment in daily industrial operations that require instant expertise and remote collaboration.

15.10.2021

From **November 15th to the 18th** over 100,000 visitors are expected to attend **ADIPEC - Abu Dhabi Petroleum Exhibition**, the world's most influential meeting place where oil, gas and energy companies and professionals convene in-person, safely and securely, to engage and identify the opportunities that will unlock new value in an evolving energy landscape. ADIPEC brings together in Abu Dhabi the oil and gas global industry: 51 exhibiting national and international oil, gas and energy companies and 26 exhibiting country pavilions along with over 2,000 exhibiting companies will meet across four days of unparalleled business networking to discuss and develop new opportunities. ADIPEC will offer the opportunity to gain insights into how the energy industry has responded to the **challenges of COVID-19**, and how it is adapting more broadly in the face of accelerated energy transitions, growing global ambitions for sustainable integrated energy value chains and net-zero emissions.

Kiber will be present in ADIPEC's Digitalisation zone, the dedicated area within Hall 13 providing a showcase of the latest technology solutions, advancements and breakthrough's that will enable the industry to accelerate the agenda of digital transformation, energy transition and decarbonisation. The entire energy industry is moving towards taking full advantage of what new technologies have to offer and the latest Kiber 3, the fully integrated AR remote assistance **wearable system for remote collaboration in field service operations**, represents the premium choice for enterprises to enable increased productivity and cost reduction.

Kiber 3 empowers workforce providing "Instant Expertise Everywhere" where there is a need to accomplish ambitious tasks in challenging conditions. **Kiber 3 is a head mounted display integrated with property software for remote collaboration**, that allows the consultation and sharing of real time informations and interaction between several participants through the use of **Augmented Reality technology tools**. Kiber 3 allows remote workers to rapidly diagnose, inspect,

operate and manage assets while supporting field operators. The applications of Kiber 3 in the Oil & Gas sector comprise **remote inspections** and **assistance**, assisting workforce in **maintenance operations**, **emergency interventions** and **plant installation** as well as being a useful solution for **workforce**.

Kiber 3 **all-in-one AR headset** is equipped with a **wide angle HD camera**, a **binocular visor**, **4GB storage** and an **8 hour battery** and offers **multiple connectivity** formulas in remote locations ranging from **Wi-Fi**, to **hot spot**, to **satellite connection** while also being able to operate in **stand alone mode**. Kiber 3 is designed to be compliant with ATEX Zone 1 Certification requirements.

Kiber 3, thanks to **data compression optimization** and specialized featured functions - such as **remote screen and file sharing**, **HD multiple visualisation and video conferencing** - brings the know-how of your best experts “on spot” in a **simple**, **safe** and **effective** way. Remote communication is possible through a **dedicated channel providing secure communication** between devices and main server. Kiber System also provides a mobile app for iOS/Android.

Federico Gulletta, Chief Executive Officer of Kiber, comments on the company’s participation to ADIPEC 2021: “We are delighted about participating as exhibitors in ADIPEC, attending this premium event of the Oil & Gas industry gives us the opportunity to present Kiber System to the professional visitors in Abu Dhabi. Kiber 3 is the latest third generation of our all-in-one AR solution for remote collaboration, providing real benefits in quality and efficiency to companies leveraging new technologies in their businesses”
