Scope

The purpose of this document is to inform Kiber Platform’s customers, prospects and partners of the most important SW and FW product developments introduced into the Kiber 3/3S solution in all the different areas of the system i.e. Devices’ FW, Mobile App as well as Web Interface.

Introduction

VRMedia policy about SW/FW releases is to make available to all its customers with a valid support contract in place three releases per year with the following target schedule:

- March
- June
- October

Each release is named according to a Roman deity as ensemble while each SW/FW component released has its own release numbering following the three digits standard such as **X.Y.Z** where:

- The first **digit X** indicates the Major release and is increased whenever the SW includes substantial changes in the architecture, components or implements a new version of the product that makes it no longer backwards compatible with the previous one.
- The second **Y digit** indicates a Minor release and is incremented whenever the SW includes a new feature (or set of new features) or an enhancement of an existing feature, while maintaining backwards compatibility with previous versions.

| Classification | Editor | Revision | Approval |
|--|-------------------|----------|----------|
| Confidential X Internal <input type="checkbox"/> Public <input type="checkbox"/> | Andrea Pieraccini | SCM | QM |

- The third **Z-digit** indicates a patch release and is increased whenever the SW includes bug correction or stability improvements that do not introduce new features or enhancements to existing functions. Here, too, backward compatibility with previous versions is preserved.

<Cerere> Release Overview

We Cerere release, we introduce Kiber Web SW Version 3.20.0, our latest update with features designed to elevate your experience. This release brings cloud integration and a revamped Gallery GUI, promising enhanced flexibility, collaboration, and an improved user experience. Read on to discover the key benefits and how these enhancements will empower your workflow.
